

The French Platinum Super-Cloners

Growlush is distributing the Platinum Super-Cloner, it is an aeroponic propagator, used to clone plants by suspending cuttings above a spinning spray head that propels fine droplets of liquid towards the stems. This method maximizes aeration and encourages rapid, vigorous root development. If you want to improve success rates, slash turnaround times and create a much more efficient indoor garden, then the Platinum Super-Cloner is for you!

- Inspired by NASA technology
- Accelerated rooting times for a quicker turnaround
- Improved cutting success rates over traditional methods
- Oxygenates root systems
- 360 degree spray head for even root coverage
- Supplied with an MZ20750CA
- Very easy to use
